

NO GO ON GOTION!

Keep the Communist Chinese Party Out of Illinois

- ⊘ Gotion is Chinese-owned and committed to communist ideals, according to their own articles of association.
- ⊘ Manteno Village Board violated their own ordinances to allow Gotion to create lithium batteries in town.
- ⊘ JB Pritzker paid Gotion \$125M in "incentive checks," which went directly to Gotion president Chen Li.
- ⊘ Your property taxes won't go down—instead, Gotion gets a tax abatement. They are capped at \$2M for 30 years.
- ⊘ Per a Freedom of Information Act request, Gotion objected to the high percentage of taxes going to our schools.
- ⊘ Gotion's total incentive package from the State of Illinois is valued at \$536M.
- ⊘ No long form from the Committee on Foreign Investment in the United States (CFIUS) has been completed for strict review. This is despite a new rule added to the National Defense Authorization Act (NDAA) that prevents batteries manufactured by Gotion and other Chinese-based and CCP-tied companies from being used by the Defense Department, deeming them a national security threat.
- ⊘ No environmental impact studies or health risk assessments have been performed to see which effects the plant might have on the fresh water basin and local endangered species, such as the mallow plant and sheepsnose mussel.
- ⊘ In 2019, debris from the quarry damaged the building that will house the Gotion plant, where volatile lithium batteries will be stored. This raises concerns for other nearby buildings—such as a daycare (0.435 miles) and a school (0.64 miles).

MAKE YOUR VOICE HEARD!
